

International Medical

We Gather Your Facts. We Combine Our Expertise. We optimize Every Alternative. We Innovate a Unique Plan. We Produce Knowledge. We Implement. We Monitor. We Manage. We Deliver Value.

We Start Over Again.

Strategic and consultative, Risk Strategies employs a diverse range of skills outside of the traditional insurance sector. As **The Education Experts**, we emphasize creativity, innovation, efficiency, flexibility and specialized industry knowledge that consistently delivers practical, cost-effective results.

Global Student Medical Risk

As many academic institutions move more assertively into the global domain, the ability to manage the health and well being of students, faculty and staff becomes increasingly difficult. The dissimilarities of the US healthcare system and those in the rest of the world often produce significant difficulties for patients and their families. The risk potential is considerable. RSC's approach is to develop and deploy protocols and insurance products to manage these situations.

Emergency Evacuation

RSC Health and Welfare brokers deliver experience and expertise in structuring international programs. Whether it's International Medical, Global Rescue and Evacuation, our Higher Education team engages insurers and vendors to develop valuable programs to protect against unexpected events.

List of Services

- Assistance while abroad
- Emergency Evacuation
- Incident Management
- Security Assistance
- Global Healthcare
- Travel Intelligence
- International Claims Management

Objective. Independent. Unbiased.

Case Study

During a recent review of a leading university's global exposures RSC identified that the institution was unable to track the location of its traveling population. This group included outbound students, faculty and administrators as well as inbound visiting scholars. RSC identified appropriate technology vendors and working with university risk management and Information Technology implemented a global tracking solution. As a result outbound travelers can now be alerted of impending risks in their locations and if necessary be assembled for safety or evacuation.

The RSC Advantage

Risk Strategies Company delivers advanced expertise in the areas of healthcare and travel risk management. Our team works at the leading edge of contract and product development.

Global Environment

The increasingly global academic environment has given rise to a set of risks not historically contemplated by colleges and universities. The academic proclivity to work at the leading edge of social and political settings may produce substantial risk. RSC has carefully selected vendors with substantial experience in these types of environments. In recent months we have facilitated the emergency evacuation of students from rapidly deteriorating political situations. These cases involve everything from armed security escorts to less complex emergency travel arrangements.
