

FINE ART PRACTICE

The fine art specialists at Risk Strategies help you safeguard the irreplaceable. Together with you, we create bespoke insurance and risk management solutions for art-related transactions and risks. This includes tailoring holistic coverages for individual artists, private collectors, foundations, galleries, museums, and experts in art storage, packing/shipping, conservation, transportation, appraisal, and other disciplines — always with your objectives in mind.

INDUSTRY INSIGHT

Today, underwriters request more information than ever to issue quotes. They have tightened requirements after paying significant claims on large private collections, shipping losses, express carrier claims, and incidents involving storage locations.

We help you tell your story effectively, so you can qualify for the most favorable coverage and terms. Risk Strategies works with you to plan for challenges ahead — from climate change to estate plans, legacy protection, and more.

SOLUTIONS & CAPABILITIES

Whether you are a multinational company, nonprofit, small business, or individual, you get integrated risk management and insurance solutions for any exposures related to fine art. In addition to insurance placement, we help with risk modeling, loss control, safety audits, disaster planning, and more.

Services include:

- **Annual risk management evaluation by a seasoned fine art specialist:** In partnership with you, we identify risk factors that need mitigation to protect your collection and improve your insurance risk profile.
- **Contract reviews through a risk management lens:** When you lend or consign masterpieces, you need the right contract provisions to protect the artwork in transit, during installation, and while on display — and to ensure you have the right insurance coverages in place.
- **Foundation asset protection:** Risk Strategies helps you align insurance limits with the board's fiduciary responsibility.

We also assist artists with specialty insurance, including coverage for restoration or reprinting costs, fabrication costs, and more.

With our extensive network of resources, from conservation experts to transit specialists, we support every facet of your risk management planning.

WHY RISK STRATEGIES

As a leader in the fine art risk management space, we serve some of the largest collections, foundations, museums, galleries, and art businesses in the world (in the public, private, and nonprofit sectors). We understand the importance of proper insurance and simple, hassle-free risk management.

The art community chooses us for three reasons:

- **True independence:** Gain an ally who advocates for you and negotiates insurance terms that meet your needs. We work with all fine art insurance companies, giving you access to more choices, including solutions for hard-to-place risks.
- **Deep-rooted expertise in art and art history:** Expect communication in your language, not insurance jargon. We are passionate about understanding your nuanced risks and protecting your fine art.
- **Decades of experience with the complex needs of fine art clients:** Ask us for advice any time on best practices and how your peers are solving complex insurance challenges. We help you find answers.

You get strategic guidance to protect your collections and the art in your care. We also assist with adjacent insurance and risk management needs — for facilities, employees, patrons, third-party vendors, events, and more.

We lead with education, empowering you with the right information to manage risk and make informed insurance decisions. You can count on caring, proactive, and responsive communication.
