

Intermodal Insurance

Built for the Way You Move Freight

Insuring intermodal trucking is not for the insurance generalist. Specialized equipment, regulatory requirements, diverse cargo types, operations that cross borders make your business uniquely complex. Standard trucking insurance simply won't get the job done. You need a specialist who understands the risks tied to the way you move freight.

Coverage Designed for Intermodal Carriers

Risk Strategies has access to an exclusive program that is specifically designed for intermodal transportation. Your existing coverage activity for other operations stays untouched and the program is managed by professionals who run insurance for some of the country's largest intermodal trucking businesses. As part of the program, you'll also receive membership in the Independent Carrier Safety Association (ICSA), supporting your commitment to a strong safety culture.

Coverages Offered

Most programs stop at basic coverage. Ours goes further to include Occupational Accident and Contingent Liability for more complete protection and fewer administrative headaches.

- Auto Liability
- General Liability
- Trailer Interchange
- Motor Truck Cargo
- Physical damage
- Occupational Accident
- Contingent Liability, and more

Smart Billing That Works Like You Do

A weekly ACH, pay-as-you-go structure means you only pay for the trucks that are dispatched.

- No unnecessary overhead
- No long-term commitments
- Onboard and offboard owner-operators with only one week's cost at risk

Who Qualifies

Our program is open to local and intermediate radius intermodal carriers. Coverage is valid in all states except AK, HI, MA, MT, and NY.
