

**Prevention is the best medicine** and with Cyber Resolute, policyholders can apply a 10% return premium credit towards proactive services to address commonly exploited vulnerabilities and reduce cyber risk.

Fortifying your organization's Cyber Risk profile can reduce your total cost of risk while boosting operational resiliency.

## Marquee offerings

### Reveles- Data Insight Software

Securely connected to all your organization's databases and applications, Reveles delivers granular detail on all personal identifiable information in your care, custody, or control. This insight makes data actionable; enabling removal of unnecessary information and prioritizing securitization of your most sensitive assets. This information can also reduce costs during a forensic investigation following a data security incident.

Cyber Resolute policyholders get one complimentary scan. A free month of service can be obtained by using the Cyber Resolute Supplemental Coverage proactive risk management return premium credit.

### Global Cyber Risk, LLC- Cyber Assessment

GCR has developed leading expertise in conducting cyber risk assessments against best practices and standards and compliance requirements. The assessment reviews critical risk control points known to create vulnerabilities and increase the likelihood of cyber attacks. The report enables small and mid-sized businesses to:

- Know the maturity of their cybersecurity program through security and risk scoring
- Know the gaps and deficiencies in cybersecurity program
- Build maturity from a prioritized remediation plan
- Present the organization as a trusted partner in the marketplace and to business partners.

### Marcum LLP - Information Security Awareness Training

The sophistication and increasing volume of cyber-attacks coupled with the frequency of individual missteps makes security awareness training a critical component of any organization's security plan. Security training helps influence behavior, mitigate risk, and ensure compliance.

Marcum's Information Security Awareness Training covers the key points; from properly identifying and responding to common workforce security threats to understanding information security and acceptable usage policies. Training may be provided in person or via web-conference. Curriculum and training material are designed for your unique business environment. Training sessions last an hour and includes 45 minutes, plus a 15-minute Q&A/discussion segment. Up to three of the same curriculum training sessions may be delivered during any single day.

Alternatively, powered by Global Learning Systems, Marcum also delivers training in a self-paced online format through a secure learning management system. The training includes individual courses or packages on security awareness, anti-phishing and data protection that address the needs of participants from all levels of the organization.
